

# INDIGENOUS WISDOM FOR A VITAL PLANET

## KNOWLEDGE

Indigenous knowledge of biodiversity and ecosystems is vitally important for monitoring climate change, successful adaptation, rights-based mitigation and conservation.

## ADAPTATION

National Adaptation Plans and NAPAs need to integrate Traditional Ecological Knowledge.

## MITIGATION

African Commission on Human and Peoples Rights needs to be made the Regional safeguard mechanism for human rights and land tenure in relation to REDD+ and other climate mitigation projects.

## GREEN ECONOMY

A low carbon economy is only achievable with GREEN GOVERNANCE.

INDIGENOUS VALUES - EQUITY – RIGHTS – PARTICIPATION – LOW CARBON ECONOMY – GOOD GOVERNANCE – TRADITIONAL ECOLOGICAL KNOWLEDGE
